

5 Easy steps to get your iPhone Application Uploaded to iTunes via the Adobe Flash Packager for iPhone :)

September 24th, 2010

5 Easy steps to get your iPhone Application Uploaded to iTunes via the Adobe Flash Packager for iPhone 😊

1. Go to the iOS Provisioning Portal and setup your Distribution Certificate & Distribution Provisioning Profile (this is Distribution NOT Developer so make sure you select the other tab).
2. Generate a .p12 Certificate from the Distribution Certificate (the .mobileprovision is fine how it is).
3. Within the Flash IDE select your Distribution Certificate & Distribution Provisioning Profile to be used then make sure you select under iPhone deployment type, Deployment - Apple App Store. Generate your .ipa file.
4. Transfer your .ipa file to a Apple Mac Computer, rename the .ipa file to .zip file extension, then extract the .zip file it will output a folder called Payload open it and within that folder will be a file with the same name as your Application. Right click and select Compress.
5. Now open up Application Loader and your good to go!

Ok well not so easy ...

Also added it to Adobe Packager for iPhone Forum here

WordPress Upgrade Nightmare - WordPress admin privileges gone?

September 11th, 2010

For some unknow reason while doing a automatic upgrade I lost all my admin privileges... tried everything forced reinstall deactiating all plugins adding .htaccess files etc etc... this is the only solution that worked for me.

```
Access your database via phpMyAdmin (most hosting providers offer this in their control panel), go to the wp_users table and find the row for your user_login . Note the ID of this row. Now, go to the wp_usermeta table and find the wp_capabilities row for your user_id . Set the value of this row to a:1:{s:13:"administrator";b:1;}
```

AS3 Escape / Unescape Method

August 13th, 2010

```
var data:String = "<\"Hello World!\" />";  
trace("data= "+data);
```

(FOTB 2010!)

```

trace( data = escape(data);
var escaped:String = escape(data);
trace("escaped= "+escaped);

var pattern:RegExp = /\+/g;
var unescaped:String = unescape(data).replace(pattern, " ");
trace("unescaped= "+unescaped);

/*
Output ++
data= < "Hello World!" />
escaped= %3C%20%22Hello%20World%21%22%20/%3E
unescaped= < "Hello World!" />
*/

Call of Duty: Black Ops Countdown Timer iPhone Web Applications

August 10th, 2010

Just watched the latest COD: BlackOps multiplayer trailer, can't wait for this looks amazing. I am going to setup a countdown timer for BlackOps like I did for MW2 was very popular and allot of people used and enjoyed it 😊

This time around going to make an iPhone application too!

AS3 Loading Images Externally

May 11th, 2010

```
var
imgPath:String="http://93.97.40.201/snapshot/snaps/19cdeb13f7c46bfafa75beeca361c916.png";

var _loader = new Loader();
_loader.contentLoaderInfo.addEventListener(Event.COMPLETE, onComplete);
_loader.contentLoaderInfo.addEventListener(ProgressEvent.PROGRESS,
onProgress);
_loader.load(new URLRequest(imgPath));

function onProgress(e:ProgressEvent):void {
    var _progress:String="Loading "+e.bytesLoaded+" of "+e.bytesTotal;
    var _percent:Number=Math.round(100*e.bytesLoaded/e.bytesTotal);
    trace(_percent + "%");
}
function onComplete(e : Event):void {
    var loaderInfo:LoaderInfo=e.target as LoaderInfo;
    var displayObject:DisplayObject=loaderInfo.content;
    stage.addChild(displayObject);
    trace("Loading Complete!");
}
```

AS3 Video Code Snippets

May 6th, 2010

Few handy code Snippets for when using AS3 & Video.

This can be used with FLVPlayback Component (just remove the vars/addChilds etc):

```
import fl.video.*;
var myVideo:FLVPlayback = new FLVPlayback();
myVideo.source = "video.flv";
myVideo.skin = "SkinOverPlayStopSeekFullVol.swf";
myVideo.addEventListener(VideoEvent.COMPLETE, completePlay);
function completePlay(e:VideoEvent):void {
    myVideo.alpha=0.2;
}
addChild(myVideo);
```

Net Stream Version:

```
var nc:NetConnection = new NetConnection();
nc.connect(null);

var ns:NetStream=new NetStream(nc);
ns.addEventListener(AsyncErrorEvent.ASYNC_ERROR, asyncErrorHandler);
ns.play("video.flv");
function asyncErrorHandler(event:AsyncErrorEvent):void {
    // ignore error
}

var vid:Video = new Video();
vid.attachNetStream(ns);
addChild(vid);

pauseBtn.addEventListener(MouseEvent.CLICK, pauseHandler);
playBtn.addEventListener(MouseEvent.CLICK, playHandler);
stopBtn.addEventListener(MouseEvent.CLICK, stopHandler);
```

Python MySQLdb install guide for cPanel/centOS

April 26th, 2010

Guide to getting MySQLdb installed for Python/MySQL to work on cPanel(11)/centOS(5.4). First you need to check if you need any of these installed (I didn't).

```
yum install python-devel
yum install MySQL-devel
yum install zlib-devel
yum install openssl-devel
```

This one I did need was, **python-setuptools** this basically allows to; *Download, build, install, upgrade, and uninstall Python packages* - as it says on the Python website.

```
yum install python-setuptools.noarch
```

Ok lets get started. run this from your cmd line/bash.

```
wget http://downloads.sourceforge.net/project/mysql-python/mysql-python-test/1.2.3c1/MySQL-python-1.2.3c1.tar.gz && tar xzf MySQL-python-1.2.3c1.tar.gz && cd MySQL-python-1.2.3c1 && python setup.py build && sudo python setup.py install
```

That's it your done! 😊 BTW, this is what I am running environment wise.

```
cPanel 11.25.0-R44718 - WHM 11.25.0 - X 3.9
CENTOS 5.4 i686 standard
```

AS3/AS2 Dynamic Gradient Mask Effect

April 11th, 2010

maskMovieClip = Instance name of your mask movie clip this is where you add the gradient/radial colour/type.

movieClip = Instance name of your movie clip you want masking.

AS3

```
movieClip.mask = maskMovieClip;  
maskMovieClip.cacheAsBitmap = true;  
movieClip.cacheAsBitmap = true;
```

AS2

```
movieClip.cacheAsBitmap = true;  
maskMovieClip.cacheAsBitmap = true;  
mask.cacheAsBitmap = true;  
movieClip.setMask("maskMovieClip");
```
